Delem DA-66T controller

- Automatic control of 8 axes translating into more efficient bending
- Storing up to 500 programs, each consisting of 25 steps and 99 repetitions
- Saving up to 30 upper and lower dies
- Controller with 2D/3D programing mode
- 17" TFT touch screen
- Windows with controller software (possibility to create programs on the PC)
- Crowning control managed through the controller.
- Complex Delem design
- USB that allows connecting in new devices
- Available space for connecting a bending angle sensor
- Controls and sensors prevent collisions along individual axes.

Delem DA-69T controller

- 2D and 3D graphical touch programming module
- 3D visualization for simulation and processing
- 17" colour TFT screen of high resolution
- Full Windows operating system
- Compatibility with the Modusys Delem system (modular scalability and adaptability)
- External USB port
- Detailed user support in a multitasking environment
- Bending using the sensors in parameter adjustment menu
- Profile-T3D offline software
